

# Early intervention and prevention for the Child's best

Being a parent is fantastic in many ways, but not always so easy.

We at Early intervention and prevention work on behalf of your child and you as a parent, for your child's best interests.

We work in counseling, treatment and prevention and, just like you, with the goal of making your child feel good.

We also have as our goal for your child to manage their schooling in a good way, now or progressively.

You and your child can receive advice and support individually or in groups in one of our courses for parent training or child groups.

If necessary, we also work in close collaboration with child health care (BVC), preschool and school. It can be about us being present at meetings or us giving advice and support to them.

Contact with us at Early Intervention and prevention is voluntary. When we meet, we do not register and do not write any journals. We have a duty of confidentiality, but just like everyone who works with children, we have an obligation to report to the social services if we have concerns regarding the well-being of a child.

## **How do I go about if my family needs advice and support?**

If you as a parent have questions concerning your child or your parenting, you can contact us directly at Early intervention and prevention.

For example, there may be questions about how you can improve your relationship with your child or how you can find ways to reduce conflicts in your family.

You can reach us by calling 0470-410 00

(Växjö Municipality contact center).

Welcome to contact us!

We see the opportunity in every meeting.

We work together because then we will be better.

What we do today matters tomorrow.
